
Health Data Overview

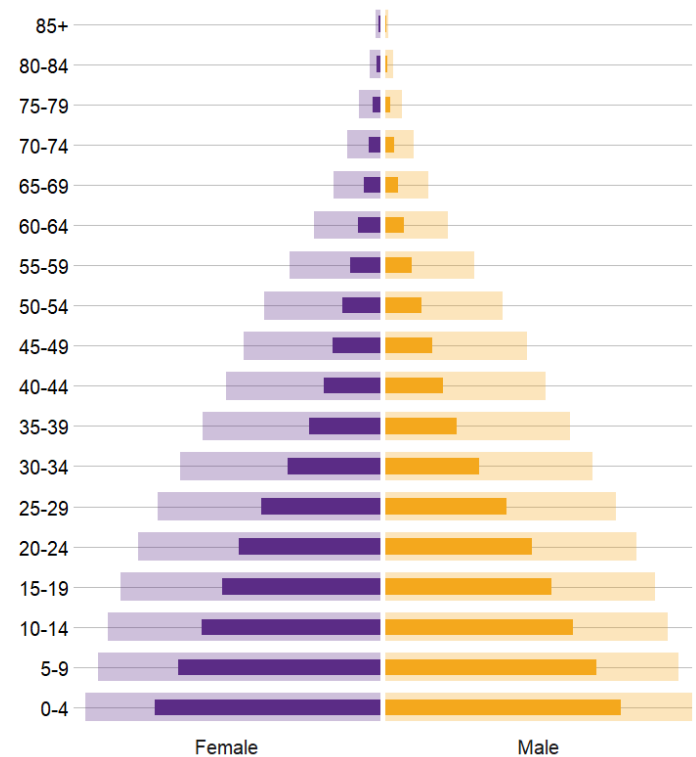

AFGHANISTAN

Overview

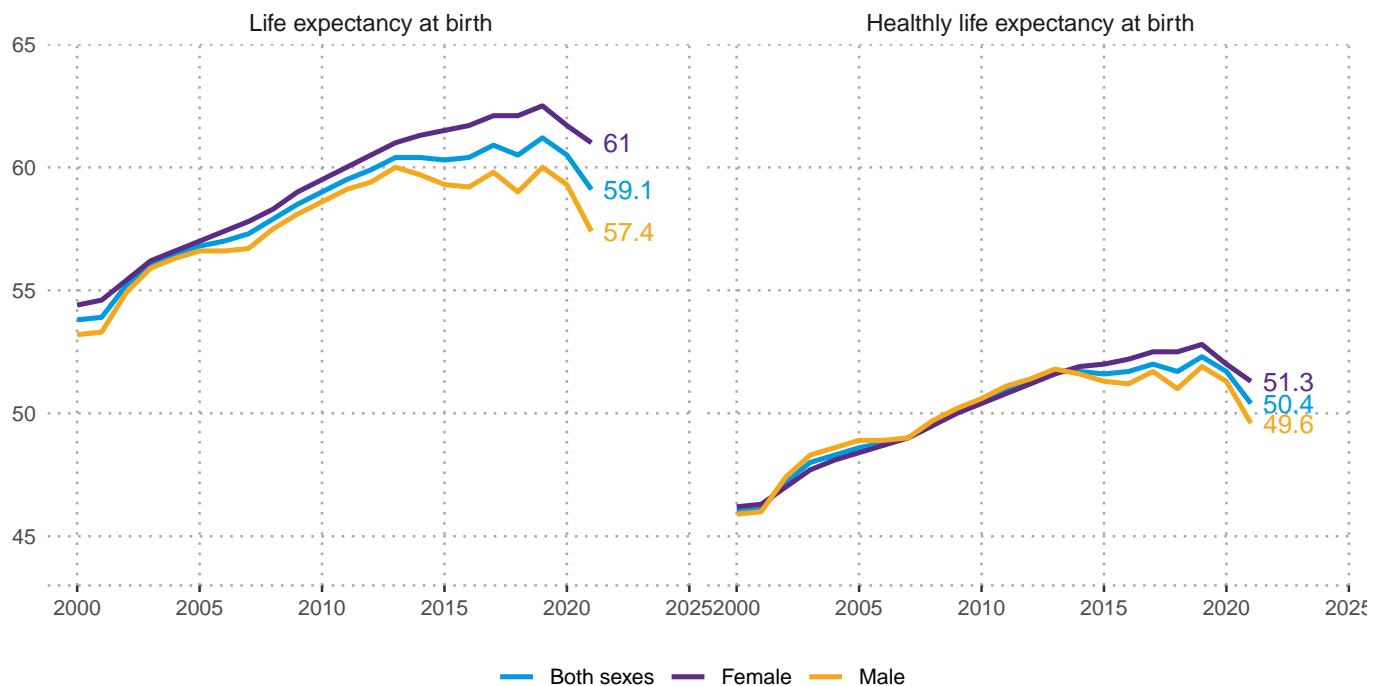

In Afghanistan, the current population is 41454.761 as of 2023 with a projected increase of 85% to 76885.135 by 2050.

Life expectancy at birth (years) has improved by 5.3 years from 53.8 [52.8 - 54.9] years in 2000 to 59.1 [58.3 - 59.9] years in 2021.

Demographic change 2023 - 2050

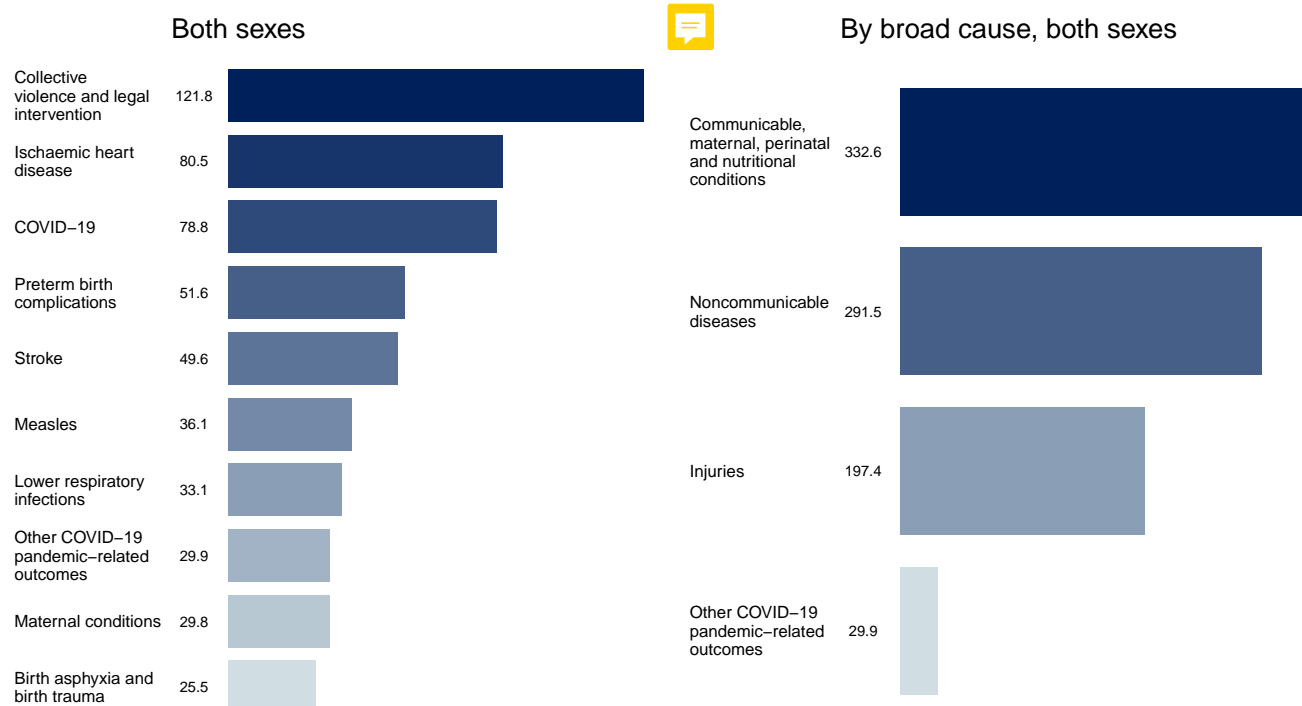

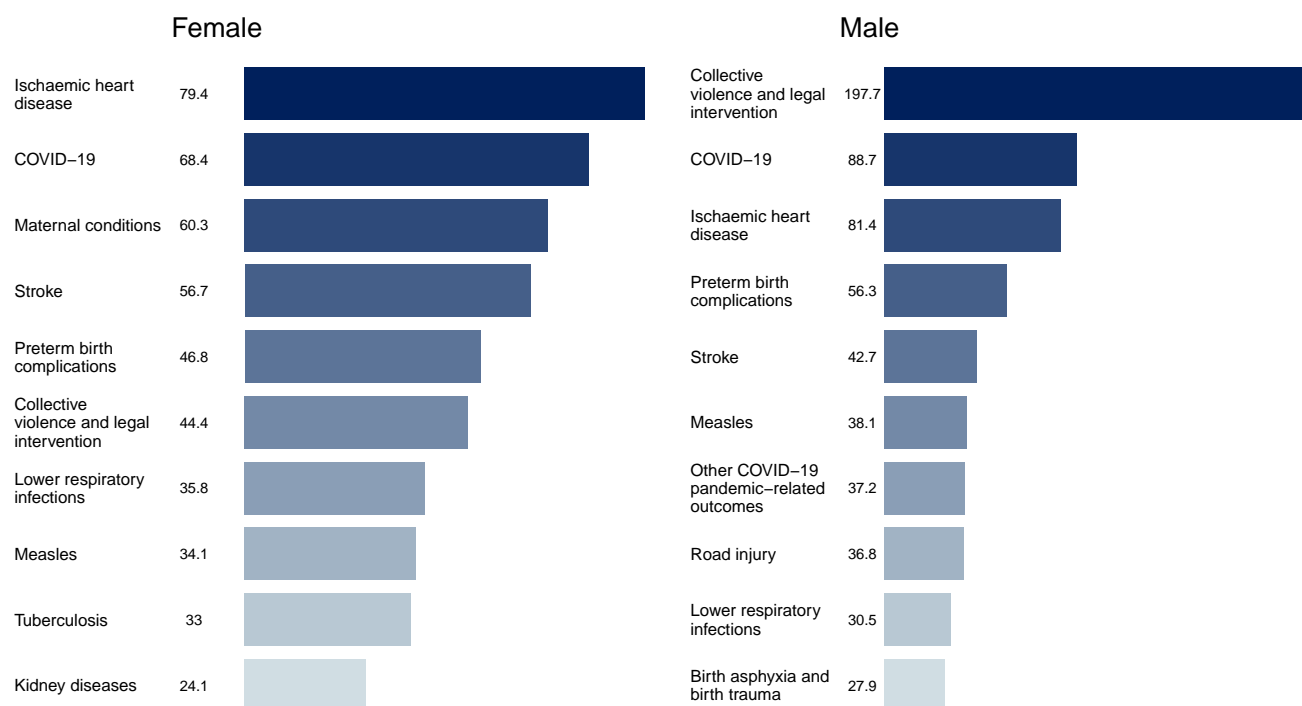

Life expectancy and healthy life expectancy by sex, 2000–2021

Top causes of death, 2021

Deaths per 100,000 population

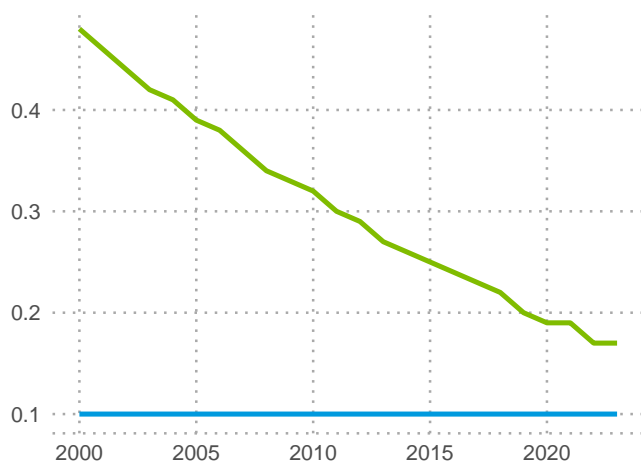

Health Statistics: Health Status

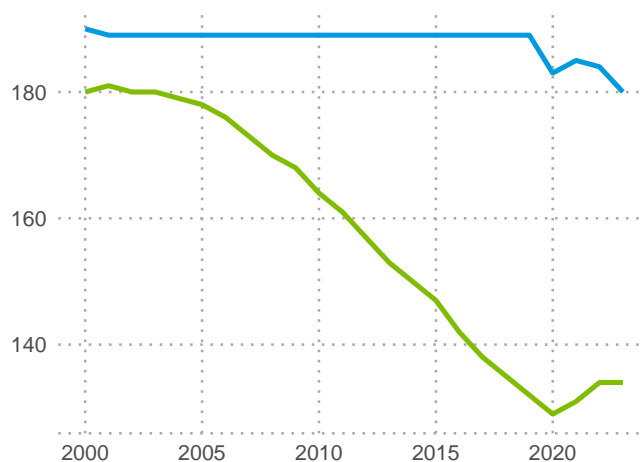

Indicator Progress

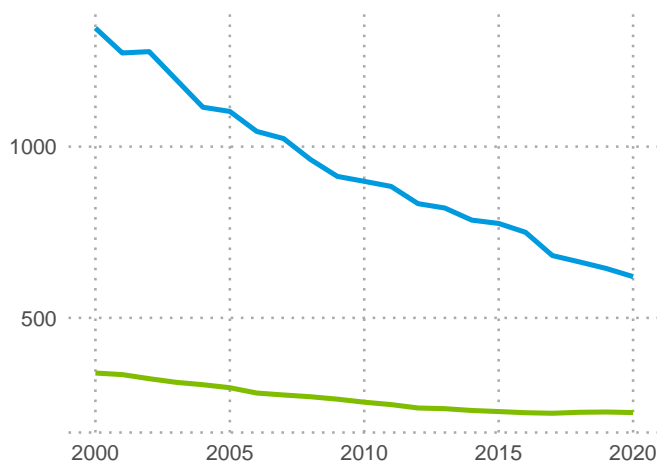

New HIV infections (per 1000 uninfected population)

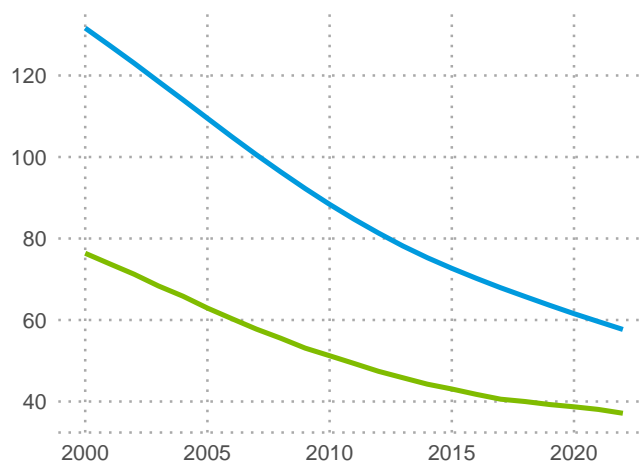

Incidence of tuberculosis (per 100 000 population per year)

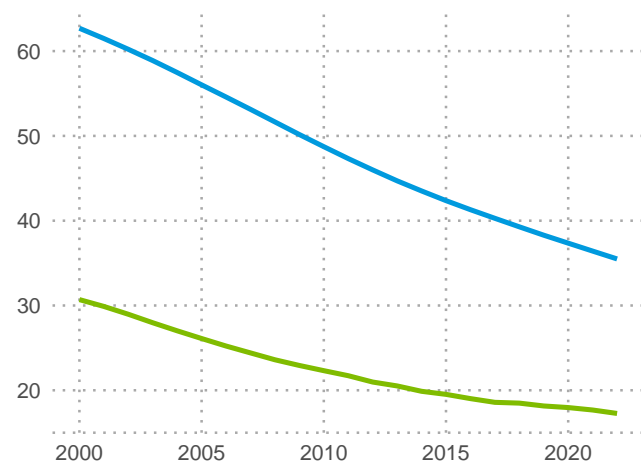

Maternal mortality ratio (per 100 000 live births)

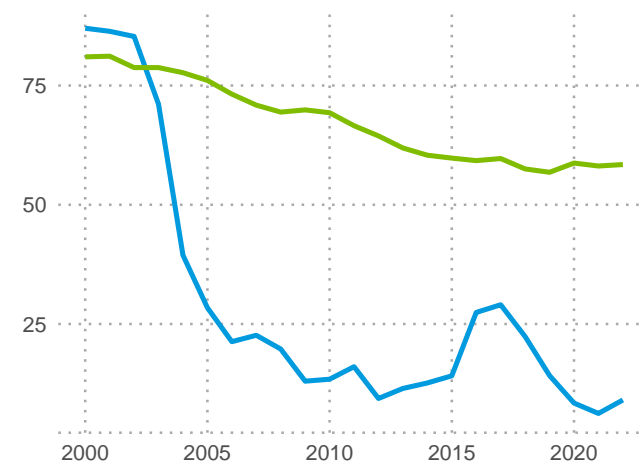

Under-five mortality rate (probability of dying by age 5 per 1000 live births)

Neonatal mortality rate (per 1000 live births)

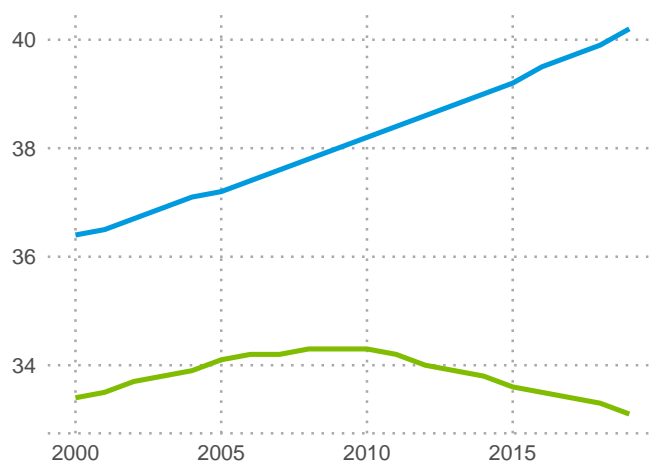

Estimated malaria incidence (per 1000 population at risk)

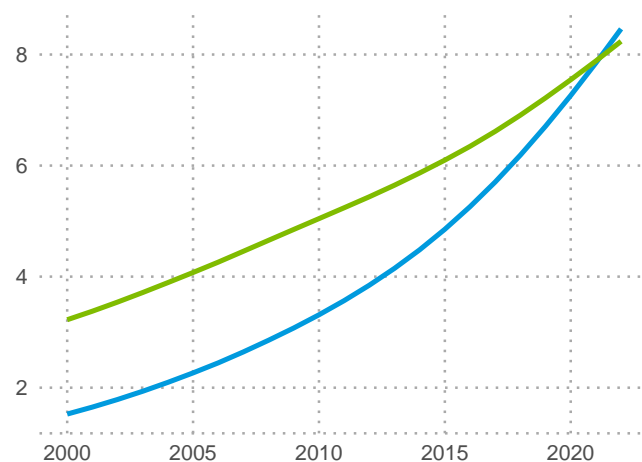

Health Statistics: Risk Factors

Indicator Progress

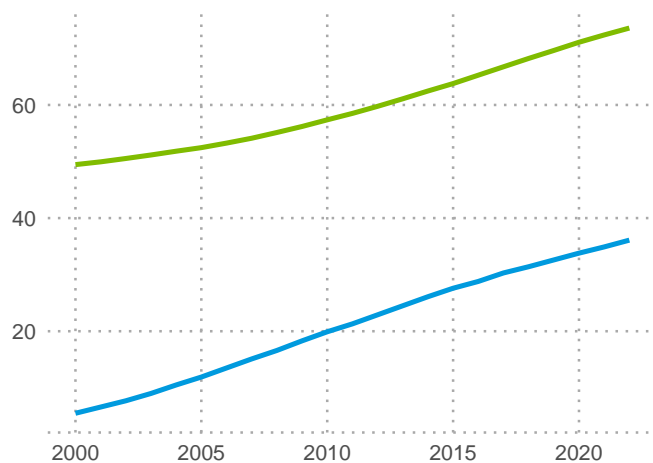

Prevalence of hypertension among adults aged 30–79 years, age-standardized (%)

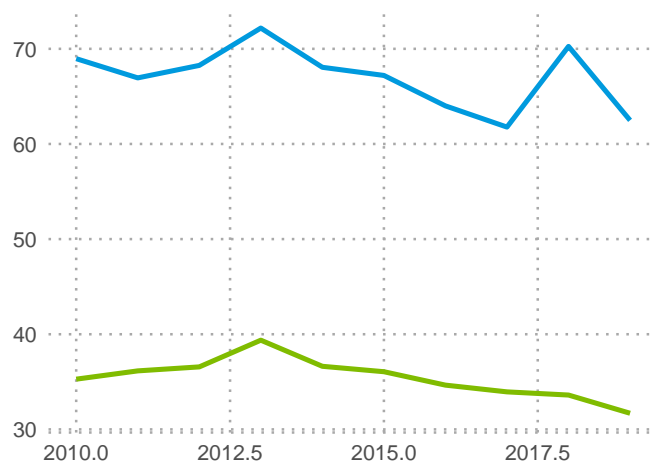

Prevalence of obesity among children and adolescents (%)

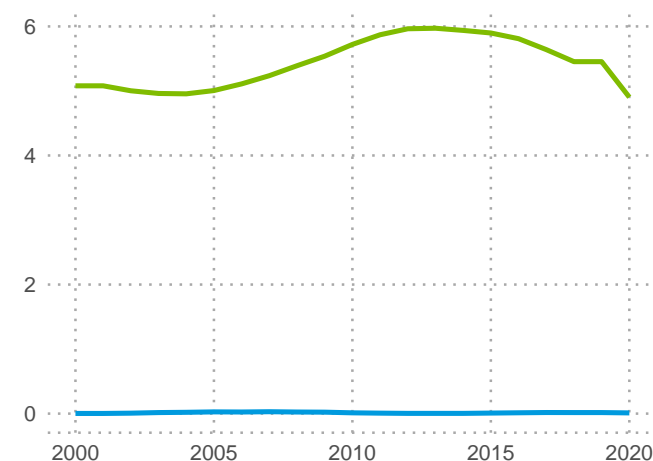

Proportion of population with primary reliance on clean fuels and technologies (%)

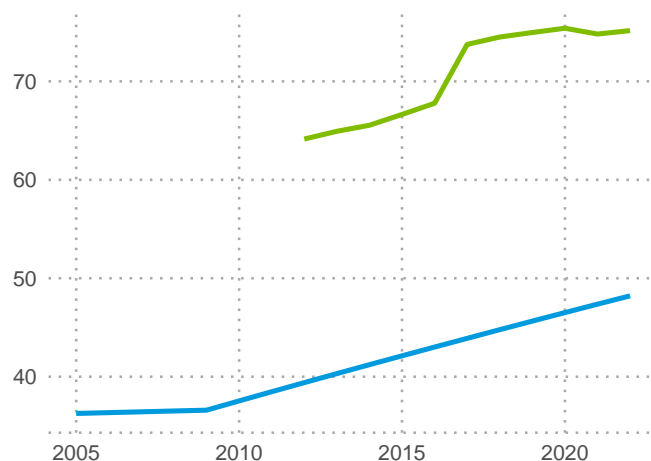

Concentrations of fine particulate matter (PM2.5)

Total alcohol per capita (≥ 15 years of age) consumption (litres of pure alcohol)

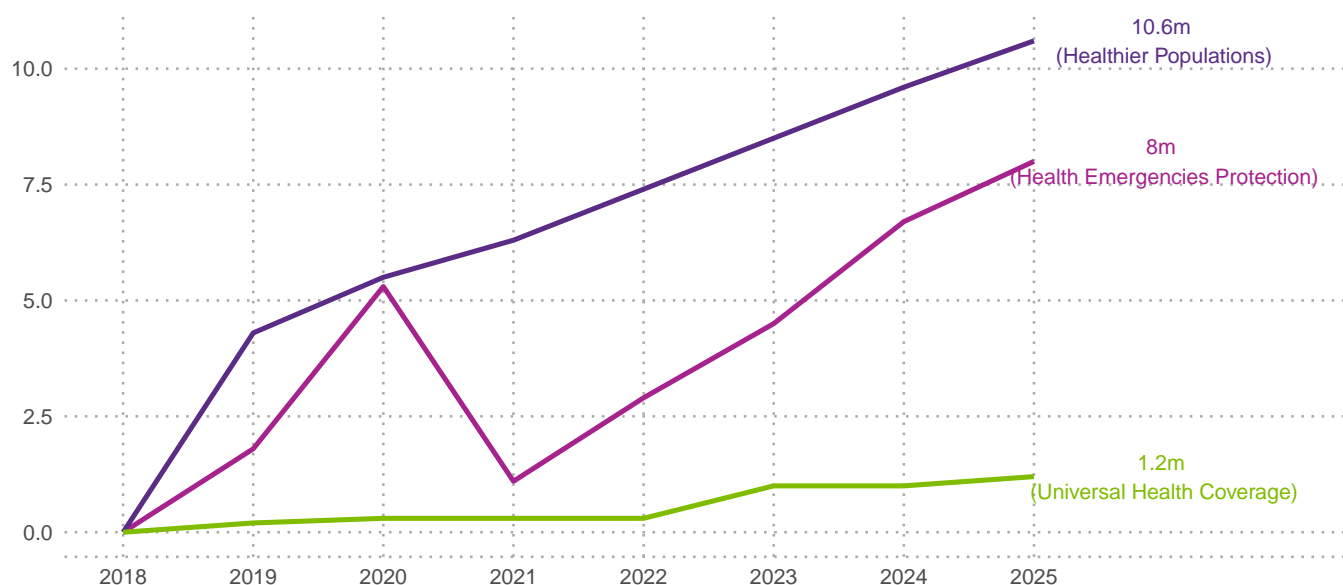

Proportion of population using a hand-washing facility with soap and water (%)

WHO Triple Billion progress

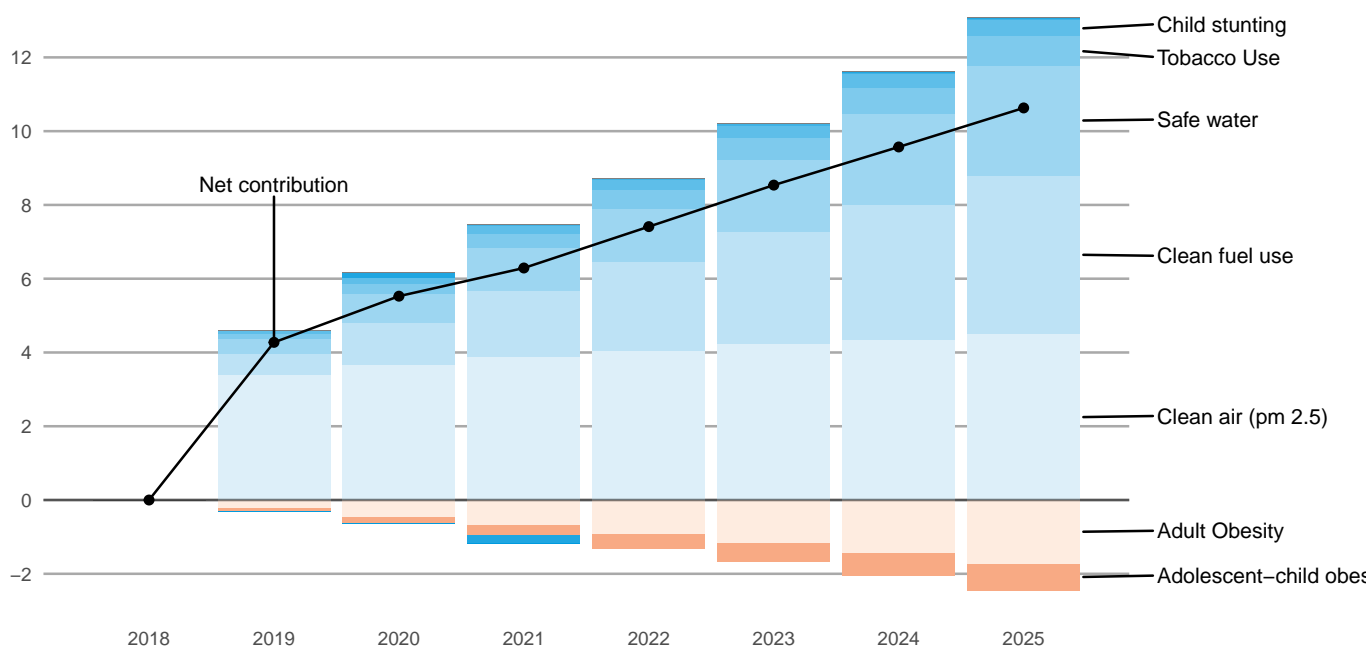

Number of people affected (millions)

In Afghanistan, by 2025 the number of additional people projected to be: enjoying better health and wellbeing is 10.6 million; covered by essential services and not experiencing financial hardship is 1.2 million; and protected from health emergencies is 13.2 million.

Healthier Populations - individual indicator contributions (millions)

Other indicators below 1% of the total absolute contribution in 2025: Child violence, Child development, Sanitation service, Sanitation service - rural, Sanitation service - urban, Partner violence, Trans-fat policy, Child wasting, Safe water - rural, Safe water - urban, Alcohol consumption, Suicide mortality, Road deaths, Child overweight.
